

Pasture and Hay Seeding Mixtures

Ed Rayburn, Extension Specialist
March 2012¹

Recommended seeding mixtures for use in pastures and hayfields.

Species	lbs/acre	Species	lbs/acre
Tall fescue, endophyte free	12	Tall fescue, endophyte enhanced	12
Kentucky bluegrass	3	Kentucky bluegrass	3
Red clover	6	Red clover	6
White clover	2	White clover	2
Orchardgrass	8	Smooth brome grass	10
Kentucky bluegrass	3	Timothy	8
Red clover	6	Red clover or alfalfa	6
White clover	2	White clover	2

Seeding rates are for pure live seed; adjust for labeled germination rate.

Do not use KY-31 endophyte-infected tall fescue on pasture or hay land due to its toxicity to livestock. For hay land on well-drained soils 8-12 lbs alfalfa seed/acre can be substituted for the red clover.

Recommended varieties

Tall fescue, endophyte-free	Select, Barolex
Tall fescue, endophyte-enhanced	Max-Q, BarOptima+E34
Kentucky bluegrass	Kenblue, Ginger
Red clover	Cinnamon+, Freedom
White clover	Will, Durana
Orchardgrass	Benchmark+, Olympia, Persist
Alfalfa	those with high disease resistance

Programs and activities offered by the West Virginia University Extension Service are available to all persons without regard to race, color, sex, disability, religion, age, veteran status, political beliefs, sexual orientation, national origin, and marital or family status. Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Director, Cooperative Extension Service, West Virginia University.
